Wireless Multimedia Speaker System

ws100

### GREAT SOUND, WIRE-FREE, IN SECONDS >

You needn't work too hard for great sound. If you're one of the millions who store your music on your desktop or laptop, Monitor Audio has designed the WS100 wireless audio system with you in mind. Position the speakers, plug-in the USB transmitter and play CD-quality sound wire-free. It really is that simple! If you love music and appreciate high performance, you'll love the WS100.

### FEEL THE QUALITY >

Each WS100 speaker cube has a rigid die-cast metal shell with a scratch-resistant polished glass top panel. A unique magnetic pivot system allows the speaker to be tilted backwards, ensuring great sound from shelf or table at any range.

### PLUG-N-PLAY EVERYWHERE >

And when you're ready for the music, it's as easy as plug-n-play. Plug the SKAA transmitter dangle into the USB port, power up the speakers through a single mains connection, and you're done! You can add as many as four WS100 systems to receive the same source. Purchase further dongles and send pristine CD-quality audio from up to four sources to the same WS100 speaker system.

The stylish remote fits snugly in hand. If you're listening to music through a media player or through the auxiliary input, use the remote to control play/pause, track up/down and volume. The volume can also be adjusted via a button on the right-hand WS100 speaker.

### FREE YOUR MUSIC >

Four decades of design knowhow give the compact WS100 monitors a specialised advantage, which offers you fabulous audio and robust reliability. When all you want is all the music, the WS100 system will bring it to life like no computer accessory ever could!

### UNIVERSALLY EASY, EXPERTLY CONCEIVED >

The WS100 speakers are designed for music lovers not network engineers. A wire-free connection to any computer – desktop or laptop, Mac or PC, is performed via the super-smart USB dongle transmitter supplied. Plug it in and the device configures automatically: Within seconds you're ready to send clean, accurate, CD-quality music to the WS100 speakers.

### DESIGN FOR SOUND >

Peerless ease-of-use is just part of the WS100 story. In the finest tradition of Monitor Audio design – recognised by experts on five continents – each active speaker has been engineered to deliver the best audio experience possible from a space-efficient 5" cube. The WS100 monitor employs custom-designed C-CAM drivers, based on the transducers used by Monitor Audio's flagship hi-fi speakers. They're driven directly by DSP (Digital Signal Processor) optimised signals from individual cool-running hi-fi amplifiers, so all the music gets through and goes loud! What's more, Monitor Audio's use of the excellent and robust SKAA™ wireless transmission system ensures that no clicks, pops or dropouts will disturb your enjoyment of the WS100 system in action. We've thought of everything!

Wireless Multimedia Speaker System

## FEATURES AT A GLANCE >

- Easy, active, high performance wire-free speaker system
- Plug-n-Play: no software required
- Universal: operates with PC and Mac and most media players
- Remote control of volume, play/pause, track up/down
- Robust, die-cast metal enclosure with pivoting action
- High quality C-CAM® metal cone drivers
- Four integral amplifiers: one per driver. Total system power 60W
- Advanced DSP. Discrete, dedicated DACs
- Patented SKAA™ wireless system
- SKAA wireless technology delivers superb CD quality audio
- Noise-free music reproduction: no cross-talk, dropouts, clicks or pops
- Add up to four pairs of WS100 to form a simple multi-room system
- Purchase up to four transmitters to power a single pair of WS100 from multiple computers.
- Connect portables through a 3.5mm Auxiliary input jack

## SPECIFICATIONS >

AIRSTREAM WS100	
Frequency response	80Hz – 25kHz
Maximum SPL (each @1M)	99.5 dBA
Power output (RMS)	Bass 2 x 20 watts Tweeter 2 x 10 watts
Drive unit complement:	2 x 75mm (3") C-CAM Cone Bass Driver 2 x 19mm (3/4") C-CAM Gold Dome Tweeter
System configuration	Sealed box
Auxiliary input impedance/ sensitivity	10 kohms/ 300mV
Wireless system	SKAA™ 2.4GHz
Wireless range	Up to 10 metres
Signal to noise SNR	>95dB
A.C input voltage	90-264V (auto range)
Amplifier category	Class D - high resolution amplifiers
Power consumption	< 0.5 watts (standby); 14.5 watts (Max)
Electrical approvals	ErP, CE, CB, cTUVus, FCC, IC, GOST
Dimensions (each) (H x W x D)	125 x 120 x 120mm (4 15/16 x 4 3/4 x 4 3/4")
Colour/ Finish	Silver cabinet with black glass top and black grille
Weight (each)	1.8 kg (4lb)
